In an even smaller area such as Conversion Optimization user-oriented design can also play an important role, such as shopping basket optimization or Customer Journey optimization.

Users are asked to complete tasks, typically while they are being observed by What are they interested in? Customer profiling is a way to create a portrait of your customers to help you make design decisions concerning your service. By understanding the human emotions, motivations, and beliefs that surround a task, a user interface can be designed to accommodate and support user behaviors in a way that users will experience as natural and satisfying.

The anticipation of possible error has financial aspects, because the late recommendations are based on the needs of the user, leaving aside what he considers secondary issues like aesthetics. Users like to concentrate on the task at hand and worry less or not at all of the tool in use and its interaction with the

designed application.
